

Engineers Without Borders – SVCE Student Chapter

COASTAL CLEAN-UP 2025

Report

Objective

The primary objective of Coastal Clean-Up 2025 was to instill environmental responsibility among students, protect marine biodiversity, and contribute to maintaining a clean and safe coastline. The initiative also aimed to create awareness on the adverse impact of plastic pollution and emphasize the role of engineers as changemakers in building a sustainable future.

Detailed Proceedings of the Event

The Coastal Clean-Up organized by Engineers Without Borders – SVCE Student Chapter, in collaboration with SWOTT, took place on 20th September 2025 at Marina Beach (Opp. V. House) from 6:00 AM to 9:00 AM. The event was carried out with the vision of protecting marine life, creating a cleaner coastline, and reinforcing the responsibility of engineers as changemakers.

1. Opening & Gathering

The participants assembled at the designated spot at Marina Beach as early as 5:45 AM. The event began with a short briefing on the importance of the clean-up drive, safety instructions, and distribution of gloves, bags, and other required materials.

2. Participation

The following members actively participated in the clean-up drive:

- Hirthik Mageshkumar, II year Biotechnology
- Gokul, II year Biotechnology
- Dharani, II year Biotechnology
- Antony, II year Mechanical Engineering
- Akshay, III year Mechanical Engineering

- Mariam, III year Biotechnology
- Janani, II year Computer Science Engineering

3. Clean-Up Activity

From 6:00 AM to 9:00 AM, participants engaged in removing plastics, bottles, wrappers, and other waste from the coastline. Volunteers worked in teams to cover different sections of the beach. Each collected bag of waste symbolized a step toward safeguarding marine biodiversity and promoting a sustainable future.

4. Impact

The clean-up drive highlighted the importance of responsible waste management and community action. Through this initiative, participants not only contributed to a cleaner environment but also set an example of leadership, teamwork, and social responsibility.

Conclusion

This event mobilized volunteers to collect and remove a significant amount of plastic and non-biodegradable waste from Marina Beach. Participants reported feeling more aware and motivated to adopt sustainable practices in their daily lives. The event strengthened teamwork, leadership, and community service spirit among members while delivering a visible impact on the coastal environment. The event concluded with words of appreciation for all volunteers. Participants were encouraged to continue advocating for sustainability beyond this activity. PCD hours were also provided to registered club members in recognition of their contribution.

Feedback from Members

Participants expressed that the Coastal Clean-Up was a meaningful and enriching experience. They appreciated the opportunity to contribute directly to environmental conservation and felt motivated to engage in similar initiatives in the future.
