

Engineers Without Borders SVCE Student Chapter And National Service Scheme

Community Outreach Project Report-2025

ENGINEERS WITHOUT BORDERS - SVCE STUDENT CHAPTER
IN COLLABORATION WITH NSS - SVCE UNIT

Presents

COMMUNITY OUTREACH PROJECT

I.INTRODUCTION

On **October 8, 2025**, the Engineers Without Borders – SVCE Student Chapter successfully organized a **Community Outreach Project** at Government C.M.S Higher Secondary School, Kanchipuram. The initiative aimed to ignite scientific curiosity, promote environmental awareness, and guide students toward meaningful career paths. This outreach was part of EWB-SVCE's continued commitment to connect classroom learning with real-world applications and to extend engineering knowledge to the community.

II.JOURNEY AND ARRIVAL

The team of volunteers assembled at the **Sri Venkateswara College of Engineering campus** early in the morning. After a short orientation and headcount, the team **departed by bus at 9:00 a.m.** The volunteers traveled with enthusiasm, carrying educational materials, saplings, posters, and experimental kits for demonstrations.

The group **reached the Government C. M. S Higher Secondary School at 10:10 a.m.** Upon arrival, the Leads addressed the team and gave a detailed briefing about the flow of the event, including classroom assignments, volunteer responsibilities, and safety instructions.

Students were grouped according to their designated classes, and each batch of volunteers comprising both **EWB** and **NSS members** moved to their allocated classrooms to begin preparations for the day's activities. The coordination between both organizations ensured discipline, teamwork, and smooth logistics throughout the event.

III.SCIENTIST CHART ACTIVITY (CLASSES 6 TO 8)

The first event of the day was the Scientist Chart Activity with Quotes, organized for students of Classes 6 to 8. Participants were encouraged to create colorful charts depicting famous scientists, their discoveries, and inspiring quotes. Volunteers guided the students in brainstorming ideas, arranging materials, and enhancing their creativity.

The atmosphere was vibrant as students engaged in drawing, writing, and decorating charts. The activity not only introduced them to the world of scientific discovery but also improved their teamwork and presentation skills.

At the end of the session, the best charts were selected from each class, and prizes were distributed to the winners. The distribution ceremony created excitement and recognition for students' creative efforts, reinforcing their enthusiasm toward science.

IV.REAL TIME EXPERIMENTS (CLASSES 9 TO 10)

Simultaneously, for Classes 9 and 10, the project team members of EWB-SVCE conducted hands-on demonstrations of curriculum-based scientific experiments. These experiments were carefully selected to align with topics in physics, chemistry, and environmental science, giving students a clear understanding of how theoretical concepts work in practice.

Experiments included demonstrations on renewable energy models, chemical reactions, and environmental testing. Students also explored engaging activities such as the Tyndall effect, Bernoulli's principle demonstration, the volcano experiment, and several other hands-on science models and also they eagerly participated by answering questions and trying small tasks themselves.

The sessions helped bridge the gap between textbook knowledge and real-world applications, inspiring curiosity and encouraging problem-solving. Volunteers used simple language and relatable examples to ensure that every student could grasp the core scientific ideas.

V.CAREER GUIDANCE SESSION (CLASSES 11 AND 12)

The concluding session began around **1:00 pm** and was dedicated to Career Guidance for higher-secondary students. The session was conducted by Mariam, Gokul, Akshay, and Gayathri, who represented the EWB core team. They spoke passionately about various career options available after school, including engineering, medicine, arts, and emerging interdisciplinary fields such as data science, renewable energy, environmental engineering, and space technology.

Through interactive discussions, the team explained how students could identify their interests, plan academic goals, and prepare for entrance exams. They emphasized the importance of self-motivation, continuous learning, and adaptability in the modern world.

The session was highly appreciated by students and teachers alike, as it provided clarity and confidence to young learners about their future paths.

VI. ENVIRONMENTAL AWARENESS AND SAPLING PLANTATION

As part of **EWB–SVCE Student Chapter** commitment to sustainability and community well being, an extensive **Environmental Awareness Drive** was carried out within the school premises. Volunteers actively distributed **dusters** to classrooms and placed **dustbins** at key locations across the campus to promote cleanliness and responsible waste management.

A special highlight of the day was the **Sapling Plantation Ceremony**, organized to reinforce the value of green living and ecological balance. The **Honourable Principal of Government C. M. S Higher Secondary School**, along with the **EWB Faculty Coordinator, Mr. S. P. Sivagnana Subramanian**, and the **NSS Faculty Coordinator**, jointly **planted a sapling** in the school garden. This meaningful gesture represented the combined efforts of both organizations toward environmental conservation and symbolized the idea of nurturing both nature and knowledge for future generations.

Students enthusiastically participated by **watering and labeling the saplings**, taking a pledge to maintain them as part of their everyday environmental responsibility. The school campus was filled with a sense of pride and purpose as young learners and volunteers worked side by side, creating a greener and cleaner learning environment.

Once all scheduled activities concluded, the event wrapped up with a **group photograph** taken in front of the school building, capturing the spirit of unity, collaboration, and achievement. The smiling faces in the photograph stood as a lasting memory of a day dedicated to learning, service, and sustainable impact.

VII.CONCLUSION

After a fulfilling day of learning and interaction, the team conducted a short **feedback and reflection session** to summarize the outcomes of the outreach. Teachers expressed their gratitude for the informative and engaging sessions, noting the enthusiasm it created among students.

By **1:45pm.**, the volunteers began packing up materials and gathered for a final photograph with the School Principal and Faculty Coordinator. The team **departed from the school at around 2:00 p.m.** and **reached SVCE by 3:15 p.m.**

The journey back was filled with cheerful discussions, as volunteers reflected on the smiles, questions, and energy of the school students. The event truly embodied the mission of EWB to engineer change for sustainable development through compassion, innovation, and community engagement.

Feedback from Members

The overall event was well-organized and executed

 Copy chart

6 responses

Communication and coordination among volunteers were effective

 Copy chart

6 responses

The activities and demonstrations ran smoothly and as planned

 Copy chart

6 responses

I had a valuable learning and teamwork experience through this event

 Copy chart

6 responses

The collaboration between **EWB-SVCE** and **NSS** worked efficiently

 Copy chart

6 responses

Overall, I am satisfied with my volunteering experience in this program

 Copy chart

6 responses

How satisfied are you with your volunteering experience?

6 responses

- It was so good and I had a great experience. The students were very interactive and engaging with our team.
- I am very satisfied
- Very good. Everything went as per plan. It was fun.
- It was a new experience .interesting and satisfying
- I am happy to be part of this event and had a new experience
- It was put together very well. I was very satisfied with the whole experience

Any suggestions or ideas to improve our next outreach event?

6 responses

-
- Nil
- A trial can be made before going to the venue
- No
- None

Feedback from School

Which event do you like the most?

 Copy chart

12 responses

On a scale of 1 to 10, how would you rate the Community Outreach Project overall?

 Copy chart

12 responses

Do you have any suggestions to improve future outreach activities?

12 responses

Effective Organization and more activities can enhance the programme.

Students participation in doing science experiments is not enough.

Time Management

Good

Time should be extended for the programs

Students knowlege improved

Nil

More involvement of students in scientific experiment is needed

Everything good

S.P. Sivagnana Subramanian
