

Engineers Without Borders – SVCE Student Chapter THINK TANK THURSDAY

Event Report

5th February 2026

The Think Tank Thursday, organized by the Engineers Without Borders (EWB) – SVCE Student Chapter, was successfully conducted as an interactive and thought-provoking session titled “**Truth or Trash.**” The event aimed to strengthen students’ logical reasoning, analytical thinking, and confidence in expressing opinions on topics related to technology, engineering, society, and the future.

The session was open to students from **all engineering departments**, with a strong focus on encouraging participation from **first-year students**. The event was designed to be engaging and pressure-free, allowing students to actively participate without requiring deep technical expertise.

The event commenced at **3:20 PM** with a brief introduction by the coordinators, during which the rules and flow of the **Truth or Trash** activity were explained. Participants were informed that they would be presented with a series of statements and given a short time to decide whether each statement was *Truth*, *Trash*, or *Depends*, followed by brief reasoning.

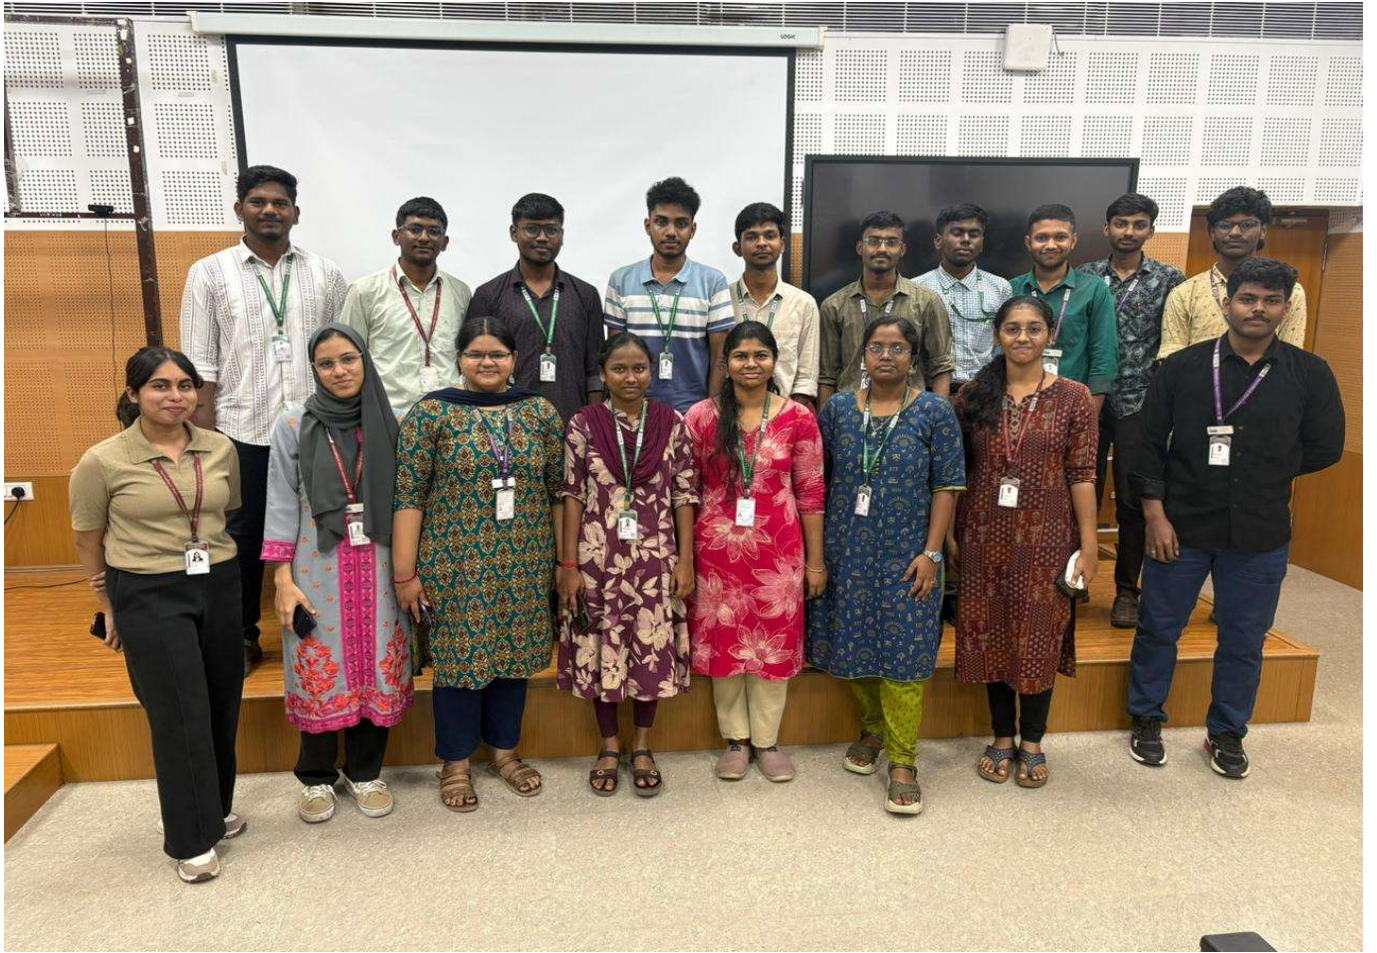

The main activity session lasted for **45 minutes**, during which **statements** were presented across three categories:

General Thinking & Technology, Core Engineering & Department Perspectives, and AI, Future & Ethics. Participants were given **15–20 seconds** to think before responding. Volunteers shared short explanations for their choices, after which the moderator revealed the correct response along with a concise clarification. Points were awarded based on accuracy, encouraging attentive thinking and participation.

The session witnessed **enthusiastic involvement, quick decision-making, and lively discussions**. Students actively engaged in evaluating statements, listening to diverse viewpoints, and refining their reasoning skills. The scoring system added a competitive element while maintaining a friendly and collaborative atmosphere.

The event concluded at **4:20 PM** with an interactive closing session. The coordinators appreciated the participants for their active involvement and thoughtful responses. Overall, the session successfully enhanced **logical thinking, decision-making skills, awareness of current technological issues, and confidence in expressing ideas**, marking another impactful and engaging edition of **Think Tank Thursday**.

Feedback from Members

What part of the session did you find most engaging and useful?

The whole structure of this interactive session was really engaging and useful

1 response

I think the department based logical question are useful

1 response

Was the session interactive enough for you to share your ideas?

Yes very much to share my pov about various aspects regarding the statements asked upon

1 response

Yes

1 response

What improvements would you suggest for future Think Tank Thursday sessions?

Time being all the things are perfectly set only thing might be if everyone comes to know about this periodically the participation might increase

1 response

Start the event at the perfect time
